Research Data Management at U of T

Dylanne Dearborn, Research Data Librarian (Science and Engineering)
December 4th, 2015
Research Data Management (RDM)

• What do we mean when we say RDM?
• Canadian RDM Landscape
UTLRDMWG

• University of Toronto Libraries Research Data Management Working Group
  – Members consist of librarians across St. George, UTM and UTSC with skills, experience and expertise in areas of research data management (RDM)
UTLRDMWG Activities to Date

- Participated in ARL eScience initiatives
- Hosted speed data-ling event for graduate students
- Developed draft framework for service delivery
- Engaged and contributing to national and internal discussions
- Developing technical infrastructure
- Collaborating with U of T peers in the OVPRI and elsewhere
- Partnered with OVPRI to draft university’s response to the Tri-Agencies Draft Principles on Data Management
- UTM survey of research and teaching faculty
- Ran journal policy analysis related to sharing requirements
- Developed and delivering GPS (Graduate Professional Skills) course
- Investigating RDM needs at the Faculty of Dentistry
- Surveyed faculty and postdoctoral fellows in the sciences and engineering
- Developed and launched RDM website
